NEW v0.4.2 · tvOS 17 + 18 supported

Flutter. Now on Apple TV.

Build tvOS apps with the Flutter framework you already know. Open source, production-ready, and engineered to feel native on the largest screen in the room.

main.dart

```
import 'package:flutter/material.dart';
import 'package:flutter_tvos/tvos.dart';

void main() {
  runTvApp(
    FocusableScope(
      child: HomeShelf(),
    ),
  );
}
```

01 / ABOUT

A first-class embedder, not a wrapper.

flutter-tvos is a real platform embedder — Flutter renders directly to tvOS, focus is wired into UIKit, and the Dart runtime talks to the system through synchronous FFI. Nothing emulated.

Zero new APIs

Existing `Focus`, `Shortcuts` and `Actions` just work. No tvOS-specific widget tree to learn.

```
// 100% framework reuse
```

Siri Remote, ready

Swipes, clicks, long-press, Play/Pause — and full MFi game-controller support out of the box.

```
// GCController bridged
```

4K & HDR aware

Display resolution, refresh rate, Dolby Vision and HDR10 capability detection. Render at native pixel density.

```
// UIScreen.maximumFramesPerSecond
```

Dart FFI, zero overhead

Synchronous platform info — no method-channel hops, no async/await. Microsecond reads of system state.

```
// 0ms platform-channel cost
```

02 / MAINTAINERS

Built by two engineers.

Independent contributors, deep in the Flutter and Apple platform stacks.
PRs welcome.

SD

Sasha Denisov

Flutter SDK contributor · RCU architecture

@sasha-denisov

// FOCUS ON

Render-tree → UIKit bridge, Reusable Cell Update protocol, focus engine integration with Flutter's FocusManager.

MU

Mehmet Ali Ustaoğlu

tvOS build system · physical device support

@maliustaoglu

// FOCUS ON

Xcode toolchain, code-signing, on-device deploy via Apple Configurator, CI matrix for tvOS simulator and hardware.

03 / GET STARTED

One command. You're shipping.

Add the package, run `flutter run -d apple-tv`, and your existing Flutter app boots on the Apple TV simulator.

pubspec | cli | git

```
$ flutter pub add flutter_tvos
```
